**WARRANTYS WILL NOT BE GIVEN WITHOUT PROOF OF PURCHASE!**

**WARRANTY INFO**

All HMF Exhausts have a two year limited warranty against manufacturing or material defects. HMF will not warranty any exhaust system due to misuse or improper installation, damage resulting from impact, modification, contact of any kind, crash, or any canister that shows excessively high internal exhaust temperatures that cause the aluminum, carbon fiber, end cap, packing, or powdercoat finish to fail. HMF holds no responsibility for any personal, vehicle or property damage due to improper use or failure to recalibrate the carburetor / EFI air fuel ratio. If there is a problem upon receiving your HMF product, contact us immediately so we can advise you of the available options. Damage due to shipping is not the responsibility of HMF and if your package is damaged you must file a claim with the shipping carrier. If you have a warranty claim you must contact HMF within 3 days for a return authorization number. HMF will evaluate the warranty and the customer will be notified of the proper actions necessary to repair or replace the product. No packages will be accepted at the HMF receiving department without an RA number. All shipping costs to HMF are the responsibility of the shipper. All HMF exhausts are designed for closed course competition use only.

**CARBON FIBER CANISTERS**

If any HMF Carbon Fiber canister starts to discolor or blemish in any way, arrangements must be made immediately to return the canister for inspection. Do not wait to cause further damage to the canister and void the warranty. This policy will be STRICTLY enforced due to the cost of the carbon fiber can. Damage to the carbon fiber canister may occur from the rear or side impact to the muffler. HMF is not responsible for damage caused by impact or improper installation. If the canister is damaged it can be replaced for a fee. Proper care of your canister should ensure an extra long life from your carbon fiber canister.

Note - There is no warranty on exhaust pipes and mufflers with regard to any form of discoloration. Discoloration (bluing) is caused by tuning characteristics, i.e. cam timing, carburetor jetting, overheating, etc., and is not caused by defective manufacturing.
