PERFORMANCE

THE ORIGINAL OFF ROAD EXHAUST SERIES

CAN AM RENEGADE 1000: DUAL FULL SYSTEM

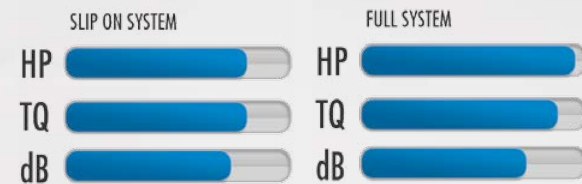

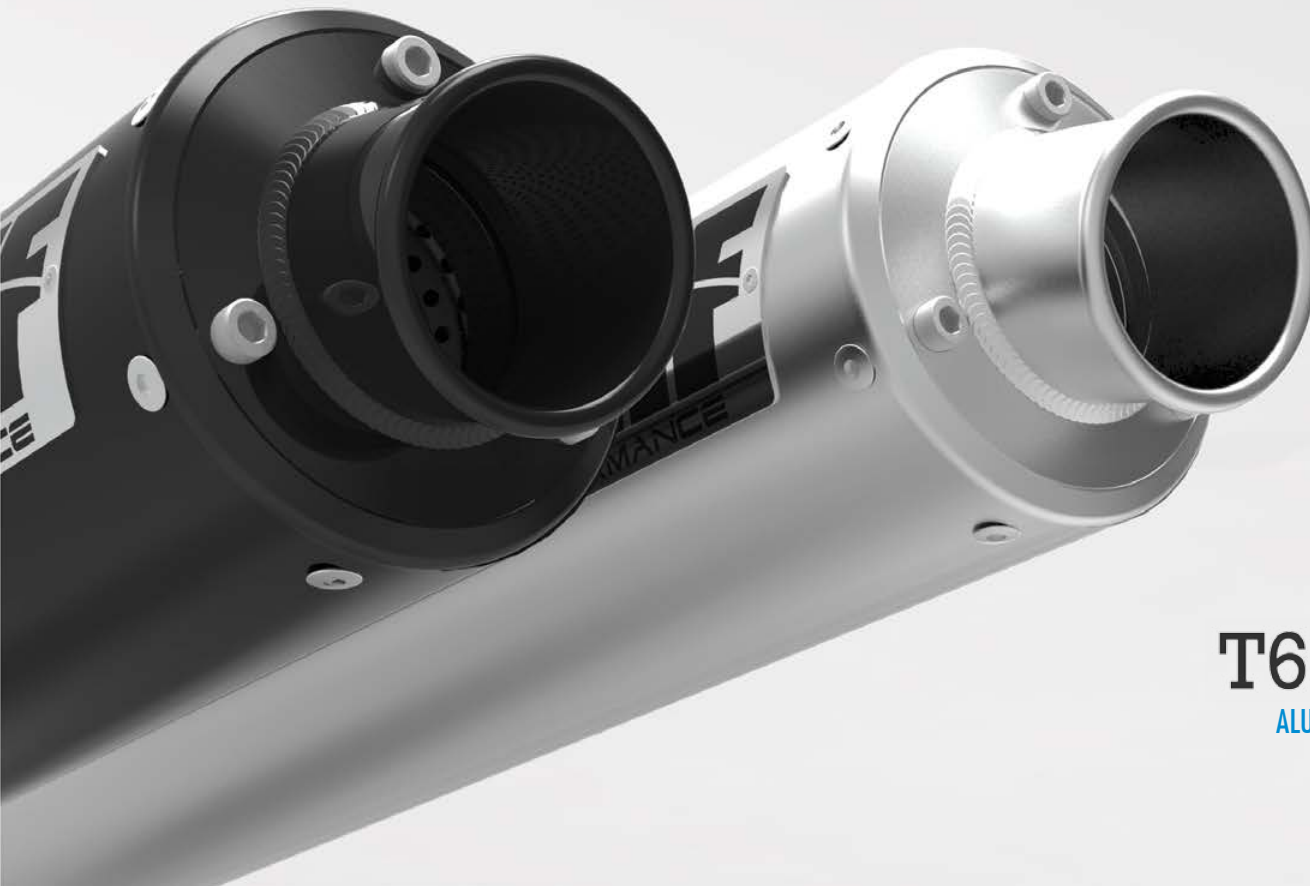

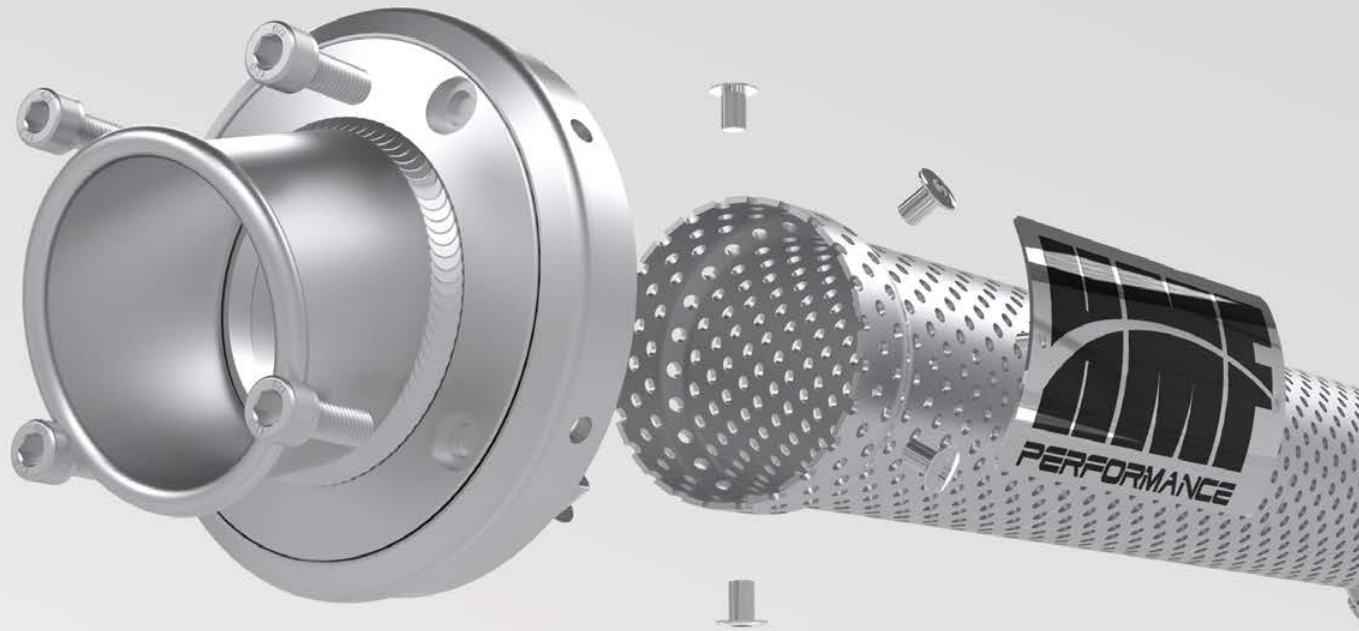

The Performance Series exhaust is the foundation that HMF was built on. The specially designed, unrestricted core allows the exhaust to increase power throughout the power curve. While our signature sound lets them know it's an HMF, our endless color combinations let them know it's "your" pipe.

Arctic Cat | Can Am | Honda | Kawasaki | KTM | Kymco | Polaris | Suzuki | Yamaha

EQUAL POWER DISTRIBUTION

Featuring a 2-1/8" unrestricted core, the Performance Series core has a special hole pattern that allows the exhaust system to increase power evenly throughout the RPM range.

The system itself is assembled on an durable 6063-T6 aluminum alloy shell, with magnesium and silicon as the alloying elements. A high-temp powder coat can be applied for a completely custom look.

COLOR OPTIONS

GET YOUR CUSTOM ON

A SERIOUS SET OF COLOR OPTIONS

HMF is the leader in custom exhaust and end cap colors. Depending on the vehicle you're riding, you can select from 3 different end cap styles, in 5 different finishes. The exhaust shell itself is also available in brushed or polished aluminum, 7 powder coated colors, or 3 carbon fiber meshes.

BLACKOUT

CERAKOTED™ TO WITHSTAND EXTREME CONDITIONS

IT'S NOT ABOUT US

With a completely different exhaust we thought that it was only appropriate to develop a new name badge. This new but simple, elegant and subtle badge has our logo but doesn't shove it in your face like a lot of other brands. This new badge adds a great touch to an already outstanding new exhaust setup with an outstanding level of contrast.

IT CAN'T ALL BE BLACK

Keeping a nice design contrast, the shell of the Blackout is a gun metal grey that compliments the flat black end cap and header. The life of your Performance or Titan Series will be extended when you get it "blackened out". As a result your exhaust should have less intense exposure to the elements, protecting you for any application or use.

TURN UP THE HEAT TO 1200°F

With our Blackout exhaust the head pipe, inlet and end cap will be covered with a high temperature ceramic coating. Capable of withstanding up to 1200 degrees Fahrenheit, this process produces a ceramic based finish that increases impact strength and hardness while increasing resistance to abrasion/wear, corrosion, and chemicals.

YAMAHA YXZ 1000R: FULL SYSTEM

MOTORCYCLES & SCOOTERS

PAVEMENT

EXHAUSTS WITH AN INCREDIBLE SOUND

HMF has been developing street exhaust systems for decades. The signature HMF sound screams down the pavement and gives the motorcycle an insane amount of horse power. Available in every HMF color option, the Performance Series is truly a one-of-a-kind exhaust with an attitude.

SUZUKI GSX-R1000: SLIP ON SYSTEM

SUZUKI GSX-R1000: SLIP ON SYSTEM

TITAN

(Formerly Swamp Series)

STAINLESS STEEL POWER

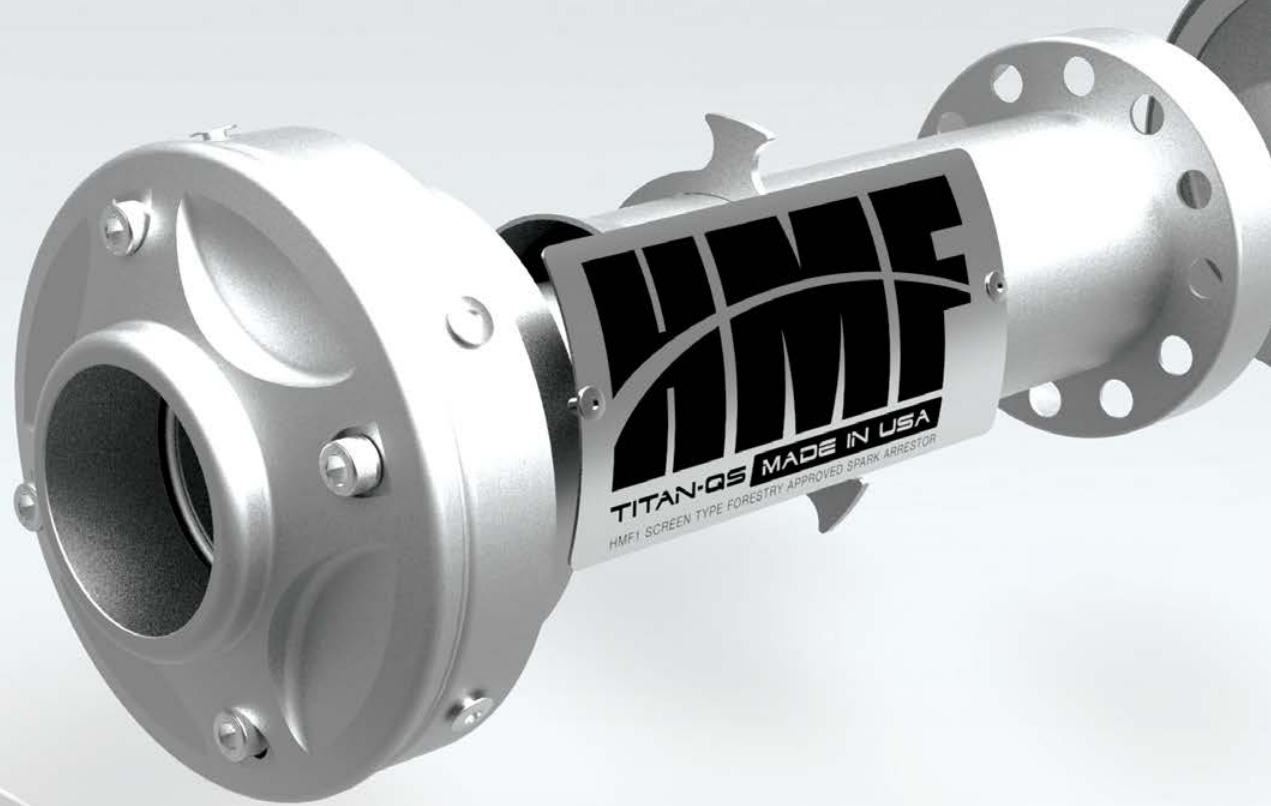

POLARIS RZR XP TURBO EPS: DUAL SLIP ON SYSTEM

The Titan Series (*formerly Swamp*) sets the standard for power, sound, and durability. Our larger diameter exhaust allows us to maximize power production, while minimizing decibel output. For those who want a workhorse exhaust that still barks, we offer the Titan-XL with a loud and aggressive growl.

CHOOSE BETWEEN A QUIET OR LOUD INTERNAL CORE

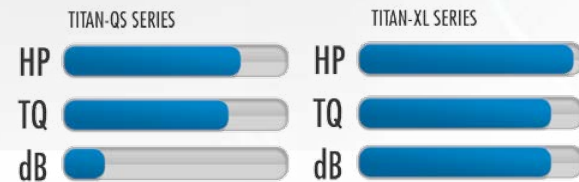

The true beauty of the Titan Series lies in the choice of core. The Titan-QS features a mechanical core design that produces incredible horse power while keeping the sound levels to a minimum. The Titan-XL is the opposite where it's completely unrestricted for maximum volume.

Each has a 304 stainless steel shell that does not readily corrode, rust or stain with water as ordinary steel does. This tough exterior shell gives the Titan Series durability that cannot be matched by any other exhaust system on the market.

SERIOUSLY, LOOK AT THIS END CAP

The large exhaust shell requires an end cap design that can match the power and durability it produces. Made from aluminum, the Billet End Cap offers a mechanical design style that allows use of the HMF exhaust components.

TITAN POWER WITH SNORKEL REACH

HONDA RUBICON: SLIP ON EXHAUST & SNORKEL

Take the durable, stainless steel power from our Titan Series and strap a snorkel on it. The Swamp Series is an exhaust system that's designed for riders to go deep water mudding without completely destroying their engine and exhaust. The tig welded inlet keeps water out, and the snorkel system keeps you breathing.

Take a stand, deep in the mud.

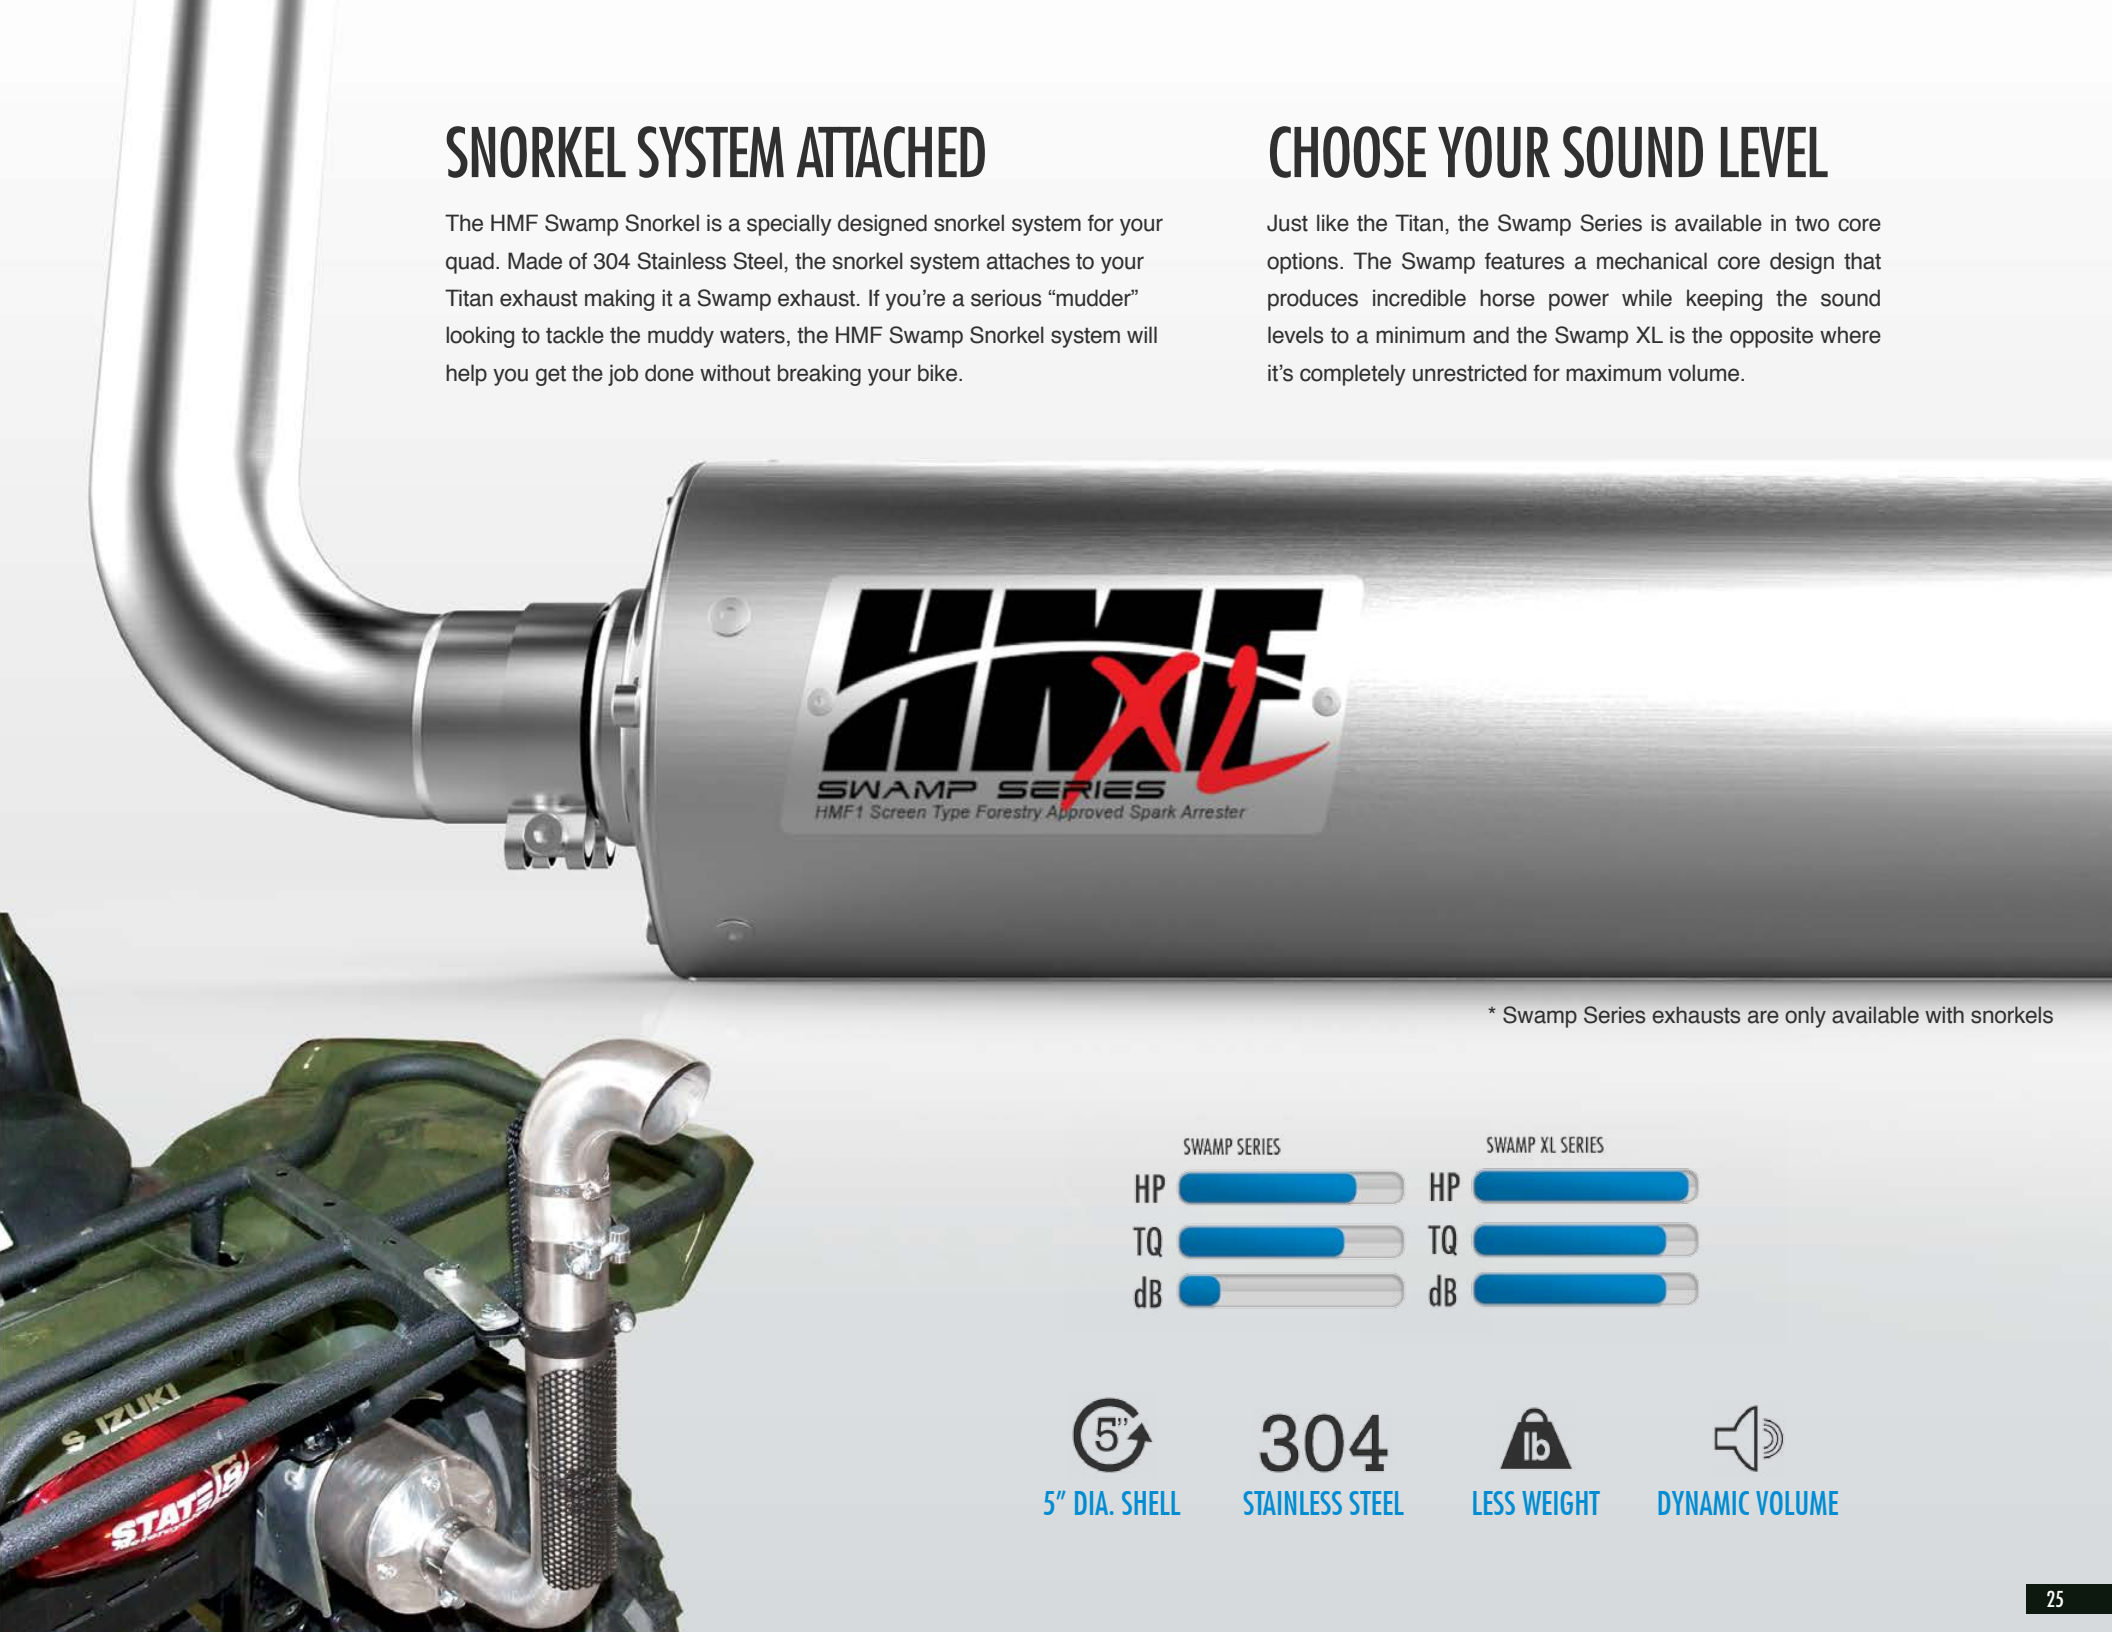

Arctic Cat | Can Am | Honda | Kawasaki | Polaris | Suzuki | Yamaha

SNORKEL SYSTEM ATTACHED

The HMF Swamp Snorkel is a specially designed snorkel system for your quad. Made of 304 Stainless Steel, the snorkel system attaches to your Titan exhaust making it a Swamp exhaust. If you're a serious "mudder" looking to tackle the muddy waters, the HMF Swamp Snorkel system will help you get the job done without breaking your bike.

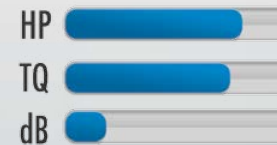

CHOOSE YOUR SOUND LEVEL

Just like the Titan, the Swamp Series is available in two core options. The Swamp features a mechanical core design that produces incredible horse power while keeping the sound levels to a minimum and the Swamp XL is the opposite where it's completely unrestricted for maximum volume.

* Swamp Series exhausts are only available with snorkels

DYNAMIC HORSE POWER AND SOUND

YAMAHA YFZ 450: FULL SYSTEM

The HMF Competition Series exhaust was designed and tested for sport ATVs. Our specialty TriMax Core technology allows us to stretch the power of a straight through core across the full RPM range. Combine this with our three stage inserts and you have the ability to change the power and sound of your ride on the fly.

IT'S ACTUALLY A TRIANGLE

This is the secret to the Competition's unique power increase. The Trimax Core has a triangular shaped portion that unleashes large horse power and torque gains in specific race fields of the RPM range.

HANG ON TO THESE LITTLE GUYS

The Competition Series features three removable inserts that change the power and sound levels of the exhaust. With a simple insert change, you can dictate the type of power and sound you need, when you need it.

Defender U4 Front Bumper

IQ EQUIPMENT

INTELLIGENTLY DESIGNED FOR SUPERIOR QUALITY

The same manufacturing philosophy that HMF has used for decades in exhaust systems, has been transformed into the new IQ Defense Equipment lineup. Built from the highest quality materials, the IQ lineup is designed to protect your vehicle while you concentrate on the ride. Our advanced manufacturing techniques are used on all IQ products, leading the way into the future of defense equipment.

HMF.WARRANTY

HMF Engineering Inc. warranties all exhaust systems for two years from the date of purchase from all manufacturing defects (broken welds, etc.). There is no warranty on exhaust pipes and mufflers with regard to any form of discoloration. Discoloration and bluing can be caused by tuning characteristics (i.e. cam timing, carburetor jetting, overheating) and is not defective manufacturing. HMF Engineering Inc. will not cover any item under warranty for any reason without valid proof of purchase (ex. receipt, bank statement or invoice).

SHIPPING

Before shipping any package to HMF Engineering Inc., you must first complete our warranty form. It can be found at hmfacing.com, or it can be faxed or mailed to you. Any exhaust system sent to HMF Engineering Inc. without a copy of the form inside the box will be refused. HMF Engineering Inc. warranties the product, not the shipping. HMF does not pay for the cost of shipping to or from HMF Engineering Inc. This includes, and is not limited to, duties, taxes and other transportation cost. Any package shipped to us with unpaid duties will be refused.

HMF Engineering Inc. will contact the customer once the packages has been received and inspected by the warranty manager. At that time, the customer will be advised if the exhaust is covered under warranty and the customer will be notified. The time frame for warranty and repairs is dependent on the current lead time of production and can be anywhere from 7-15 days.

CARBON.CANISTERS

If any HMF Engineering Inc. Carbon Fiber canister starts to discolor or blemish in any way, arrangements must be made immediately to return the canister for inspection. Do not wait to cause further damage to the canister and void the warranty. This policy will be STRICTLY enforced due to the cost of the carbon fiber can. Damage

to the carbon fiber canister may occur from rear or side impact to the muffler. HMF Engineering Inc. is not responsible for damage caused by impact or improper installation. If the canister is damaged it can be replaced for a fee. Proper care of your canister should ensure an extra long life from your carbon fiber canister.

DISCLAIMER

HMF exhausts, EFI controller, air filter, and jet kits are intended for use in closed-course competition only. HMF exhausts, EFI controller, air filter, jet kits are not intended for use in California and do not meet California, Federal, EPA, CARB on/off-road noise or emission standards. Modifications which exceed California, Federal, EPA, CARB noise or emission standards on non "closed-course competition and off-road racing use only" vehicles is prohibited by Federal Law.

FOOTNOTE

2006 and newer Motorcycles with head/tail lights OEM from the manufacturer and every all terrain vehicle, even those intended for off-road closed-course competition use, are considered California, Federal, EPA, CARB noise or emission-controlled vehicles.

Vehicle emission control information is noted in the owner's manual and on the machine air box lid and exhaust muffler.

Any modifications which exceed the CALIFORNIA FEDERAL EPA CARB noise or emission standard is prohibited by FEDERAL LAW.

EXHAUST.MAINTENANCE

Cleaning

The canister of your new HMF Exhaust can be cleaned with a mild soap and water. Cleaning it every time after you ride will help maintain the luster of your

exhaust. Restoring your inlet and head pipe can be done with a Scotch Brite pad. Use a light rubbing compound on the shell to restore shine.

Repacking (ATV/MX)

Riding style and the frequency you ride greatly effects the life of the packing.

Severe Riding (Weekly racers, Daily riders):

Check your packing after 15 hrs. of riding.

Moderate Riding (2-3 days/week riding):

Check your packing after 25 hrs. of riding.

Light riding (Average weekend rider):

Check your packing after 35 hrs. of riding.

You can check your packing by knocking along the side of your exhaust canister and listening for hollow spots. Change in sound and discoloration of the exhaust shell means it's time to repack.

ONLINE.REPAIR.FORM

Visit www.hmfracing.com and use the Warranty Repair Form to fill out your information. Once you fill out the form, you will be given an RA number. Print out your form, send the printed form, proof of purchase and your exhaust to 5111 W. 164th St. Brookpark, OH 44142. Write the RA number from the form on the outside of the box. Exhausts without this form will be declined upon receiving.
